

HIGH GAIN™ FILM

High Gain film is a specialist rear projection film primarily used for store window displays and advertising screens. This low cost projection film offers superior brightness in high ambient light and daylight. The film is available in a range of standard screen sizes (30" to 120"), in wholesale roll format (10 and 30 metre rolls) or by the linear metre off the roll (1524mm / 60" wide). Custom shapes and sizes are also available and multiple pieces can be joined to create large format displays. High Gain film is manufactured with a self adhesive layer meaning it can be easily applied to glass or plexiglas. High Gain film is a cost effective screen technology which can perform well with lower powered, less expensive projectors.

FEATURES

- » Transmission - 81%
- » Peak gain - 6.7
- » Viewing angle - 160°
- » Colour - light grey
- » Thickness - 100 microns
- » Roll width - 1524mm / 60"
- » UV stable
- » Apply to glass or plexiglas

BENEFITS

- » High brightness projection film
- » Sizes from 30" - 120"
- » Custom sizes & shapes available
- » Wholesale 10m & 30m rolls available
- » 3 year warranty
- » No critical angle of projection
- » Self adhesive / no shrinkage
- » Low cost - superior performance

APPLICATIONS

- » Window displays
- » Advertising screens
- » Reception displays
- » Exhibition / outdoor events
- » POP / POS displays
- » Information displays

ACCESSORIES

- » Interactive touch foil
- » Soundpod
- » A4 samples
- » Installation guide
