

CLEARVIEW™

Clearview diffusion screens are a transparent rear projection screen providing a low cost alternative to holographic/holo screens, with superior performance, definition and no critical angle of projection. A clear diffusion material, which still allows visibility through the screen displaying bright, sharp and vibrant images even in brightly-lit environments. Ideal for window applications, POS displays, exhibitions and advertising. This unique transparent diffusion screen is ideal for any number of video/advertising applications where you still want the ability to see through the screen. A cost effective attention grabbing screen solution that requires no critical angle of projection and at a fraction of the cost of other holographic screen technologies.

FEATURES

- » Transmission - 97%
- » Peak Gain - 7.9
- » Horizontal Half Gain +/-22°
- » Vertical Half Gain +/-22°
- » Viewing Angle - 160°
- » Thickness - 3mm
- » Weight - 3.4kg per M²

BENEFITS

- » Diffusion screen (rigid acrylic)
- » Sizes from 30" to 138"
- » Custom sizes & shapes available
- » Transparent / holo technology
- » Hand-cast material
- » Visibility through the screen
- » Screen film also available

APPLICATIONS

- » Window displays
- » Advertising screens
- » Attention grabbing screen
- » POS display / promotions
