FREESTANDING KIOSK

MULTI TOUCH

BESPOKE BRANDING

Overview

intouch™ multi-touch technologies

Our intouch Interactive Touch Kiosks are designed for areas with heavy footfall providing access to information, entertainment and commerce applications. The kiosk comes complete with HDMI / VGA connections allowing you to connect to any PC or Laptop while the integrated multi-touch transforms your finger into the mouse, making any content touch capable including browsers, PDF documents, Office applications and more.

intouch kiosks come complete with a toughened glass fascia, making it suitable for public environments. The infrared touch technology offers 6-point multi touch and extremely rapid response times. And the integrated timer allows you to assign daily or weekly schedules automatically powering down the kiosk when not in use.

The minimal and contemporary design is available in 3 options designed to suit your needs:

- Black Gloss – standard
- White Gloss
- or your own bespoke branding
