PRODISPLAY

CAVE PROJECTION SCREENS

Pro Display's CAVE Projection Screens transport you anywhere, providing a UHD 4K projector screen designed to create immersive environments. CAVE projection systems are generally made up of 4-6 high resolution screens that are projected onto in ultra high quality to create AR experiences.

Our CAVE screens produce stunning contrast levels, colour saturation and pixel resolution, all of which come together to create a realistic digital display that's perfect for even large scale simulation applications.

With glass options in sizes up to 6m x 3m and acrylic options in sizes up to 8m x 3m, our CAVE Projection Screens have the potential to create huge immersive systems, with edge blending, 360° digital imagery and 3D active stereoscopic options also available.

SPECIFICATIONS

- Front, Rear & Dual Image options available
- 3D Active Stereoscopic options available
- Options available for Edge Blending
- Supports Ultra-Short Throw Projection
- Anti-Glare options available

BENEFITS

- Custom sizes available up to 8m x 3m
