

**PRODISPLAY**<sup>®</sup>

**CLEARVIEW REAR PROJECTION SCREEN**

Clearview diffusion screens are a transparent rear projection screen providing a low cost alternative to holographic/ho screens, with superior performance, definition and no critical angle of projection.

A clear diffusion material, which still allows visibility through the screen displaying bright, sharp and vibrant images even in brightly-lit environments. Ideal for window applications, POS displays, exhibitions and advertising. This unique transparent diffusion screen is ideal for any number of video/advertising applications where you still want the ability to see through the screen.

A cost effective attention grabbing screen solution that requires no critical angle of projection and at a fraction of the cost of other holographic screen technologies.

## SPECIFICATIONS

- Transmission - 97%
- Peak Gain - 7.9
- Horizontal/Vertical Half Gain - +/-22 °
- Viewing Angle - 160°
- Standard screen sizes from 32"-134 "

## BENEFITS

- Transparent, see-through screen
- Diffusion screen (Rigid acrylic)
