

PRODISPLAY

ELECTRIC PROJECTOR SCREEN

Pro Display's Electric Projection Screens are a versatile projection solution, ideal for both commercial and residential environments. Offering solutions for front, rear and dual projection these motorised screens are available in standard sizes from 80"-132" as well as custom screen sizes up to 5m in width.

These roll down screens produce high gain and high contrast 4K/HD images and can be controlled by remote control which comes included as well as necessary fixings.

The discreet nature of an Electric Screen makes it perfect for integration into home theatre applications or corporate environments. Requiring no wall space our electric screens are ideally suited to areas that require an adaptable space, creating a flexible display solution that can be made available in seconds.
