PRODISPLAY

MAGIC MIRROR DISPLAY

Mirrorvision mirror retail displays combining a highly reflective mirror with a commercial grade HD/4K screen. Available in standard sizes from 32"-86", our Magic Mirror Displays can be customised with a range of mirror tints, including 'Standard' a darker tint that maximised image quality or our 'High Reflective' and 'Ultra High Reflective' tints offering a brighter finish that maximises reflective mirror effect.

As a screen that also functions as a mirror it's ideal for 24/7 use, meaning your space can still be productive even when you're not there. Content can be uploaded via USB playback, HDMI/VGA inputs or can also be manufactured with an integrated media player or PC. This product is perfect for retail changing rooms, toilets & restroom mirrors or even car showroom displays.

This mirror screen is also compatible with our Infrared Multi Touch frame, offering the ultimate mirrored retail display for engaging your customers. We can also offer Mirrorvision Overlays (with or without interactivity) to upgrade existing LCD screens.
