

PRODISPLAY

MIRROR TV OVERLAY KIT

Mirrorvision is Pro Display's unique mirror-finish glass, designed to add an extra dose of style to Smart TV's. When the display is switched off, the glass looks just like a normal mirror... switch on the screen and the image appears magically through the glass. Mirrorvision's special mirror finish also helps to improve image quality, enhancing contrast and colour.

Choose from a range of Mirrorvision finishes: Standard; a darker tint that maximises image quality; or High Reflective, a brighter finish that maximises the reflective mirror effect, ideal for cosmetic applications. Our DIY Mirror TV Overlay kits come complete with your made to measure Mirrorvision Overlay, integration adhesive and IPA wipes, as well as a comprehensive installation guide to support you throughout the process.

Mirrorvision glass can be manufactured to your custom dimensions, with or without frames to fit with any decor. The glass can be made much larger than the screen too, for full height mirrors with the screen hidden exactly where you want it.
