

PRODISPLAY

OUTDOOR LED SCREENS

Pro Display's Outdoor LED Screens offer a robust, high brightness display that's can be appreciated for miles. Available in a range of pixel pitches (resolutions) from 4mm to 40mm*, our LED screens cater for both high quality viewing, best suited to smaller more intimate events and long distance applications like stadiums, concerts and billboard advertising.

Shipped modularly our Outdoor LED Screens can be easily rearranged and reformatted to produce larger LED screens in different shapes, offering wide viewing angles and brightnesses from 5,000 - 6,000nits, guaranteed to get noticed in even the sunniest of destinations.

Our Outdoor LED Screens are simple to set up coming complete with the modular LED panels, control system and basic operating software to get you up and running in no time with options for both front and rear access options for screen maintenance.
