

**PRODISPLAY**<sup>®</sup>

**ULTRA BLACK REAR PROJECTION SCREEN**

Ultra Black is an optical rear projection screen which has been developed for both high end video, digital signage and home theatre applications. This unique black screen technology recreates images with unsurpassed contrast and resolution.

The acrylic gloss black surface provides sharp, crystal clear and lifelike images resembling that of a high-end LCD panel. When installed on our weighted cable suspension system the Ultra Black screen offers a very minimalist look and feel, displaying images that appear to be floating in mid air.

This technology blends in well with today's contemporary interiors, creating a world where screens become an integral part of the room's décor or their own piece of moving art. For individuals who have a need to be different and a desire for the very latest and innovative technology, this is a must have product.

## SPECIFICATIONS

- Transmission - 50%
- Peak Gain - 2.4
- Horizontal/Vertical Half Gain - +/-24°
- Viewing angle 140°
- Standard screen sizes from 32"-134"
