

PRODISPLAY

OUTDOOR HIGH BRIGHTNESS DISPLAY

Our IP65 High Brightness Outdoor LCD Screen is manufactured specifically to perform in brightly lit environments, even in direct sunlight, making it ideal for the outdoor applications. With a fully protected IP65 rated enclosure, you can be confident in this screen's reliability and longevity.

Pro Display offers additional extras for this product, including a WiFi / LAN module, enabling remote updating of content and scheduling, and even a touchscreen fascia, enabling interactive functionality. The commercial grade high brightness screen is designed for 24/7 use, offering high contrast, excellent colour reproduction with a backlight producing a high brightness display of 2,500 nits.

Available in standard sizes from 32" to 86", we also offer a range of Outdoor free-standing advertising kiosks as well as indoor high brightness screens that can be used in direct sunlight.
