

**PRODISPLAY®**

## HIGH RESOLUTION OUTDOOR LED SCREENS

Unlike traditional large-format screens, this innovative technology eliminates the noticeable gaps between pixels, creating a smooth, cohesive picture, even when viewed up close. You get true black levels, vibrant colour accuracy, and incredible contrast, making imagery pop.

Ideal for high-impact commercial installations, broadcast, and premium corporate environments where detail matters. Micro-Pixel LED Screens are built for seamless video wall integration and reliable, long-term operation. It's the ultimate display for visual excellence.

### SPECIFICATIONS

- Pixel pitch from 1.2mm to 2.5mm
- Standard screen sizes: 130", 174", 217", 260" (16:9)
- Brightness: 3,500 nits
