

PRODISPLAY[®] HOLOGRAPHIC EFFECT TRANSPARENT LED MESH

This innovative arrangement ensures high transparency while maintaining exceptional clarity. This transparent LED mesh is perfect for applications where visibility and natural light are essential. It allows users to display captivating holographic imagery without obstructing the view. The flexible LED structure can be easily installed on existing glass surfaces, transforming your space with a truly eye-catching and unique display.

SPECIFICATIONS

- Transparency: > 70-90%
- Brightness: 2,500-5,000 cd/m²
- Module size: 1500 x 260 x 2 mm
- Pixel pitch: 3.91mm / 6.25mm / 10mm
- Viewing angle: 160° (H) / 160° (V)

BENEFITS

- High transparency, ensuring natural light and background sightlines are not blocked.
- Content appears to float seamlessly in mid-air, creating a 3D-like visual experience
- Delivers high luminance that remains vivid and legible even in direct daylight.
- Slim, low-mass panels that simplify transport and reduce structural stress.
- Easily adapts to different environments through custom sizes and shapes.

APPLICATIONS

- Retail storefronts
- Stage and theatre productions
- Exhibitions and trade shows
- Architectural building façades
- Museums and visitor attractions
