

PRODISPLAY

OUTDOOR HIGH BRIGHTNESS WALL MOUNT DISPLAY

Our High-Brightness Outdoor Wall-Mount Displays are engineered to deliver high-impact visual communication in the most challenging environments. Featuring a massive 3000 nits brightness and a specialised high-temperature reliable glass (stable from -10°C up to 110°C), these screens ensure your content remains vivid and clear even in direct sunlight. Built with a robust IP66-rated waterproof structure and IK10 vandal-proof glass, they offer the ultimate protection for 24/7 outdoor operation.

SPECIFICATIONS

- Screen sizes: 55", 65", 75", 86"
- Brightness: 3000 nits, paired with an auto-brightness sensor.
- IK10 anti-glare tempered glass
- Smart Temperature Controller; captures 99.6% of dust
- Wi-Fi, RJ45 Ethernet, and HDMI input; Optional: 4G SIM and touch control.

BENEFITS

- Content remains vibrant and legible in bright sunlight.
- Safeguards internal electronics against rain, snow, and airborne dust particles.
- Fan-cooling to support round-the-clock operation without overheating.
- Portrait or landscape orientation to fit specific branding and layout needs.
- Integrated Level 3 lightning, short-circuit and internal leakage protection

APPLICATIONS

- Outdoor retail advertising
- Quick Service Restaurants
- Public transport hubs
- Entertainment and venues
- Corporate and education campuses
